SUMMARY

Full Stack MERN Developer with 1 year of experience in frontend and backend development using React.js, Node.js, Express.js, and MongoDB. Skilled in building responsive UI, REST APIs, authentication, RBAC, CRUD operations, state management with Redux, and database management. Experienced with Tailwind CSS, TanStack Query, and reusable component architecture. Strong understanding of full-stack web application development, performance optimization, and clean code practices.

PROFESSIONAL EXPERIENCE

DVG Soft, MERN Stack Developer 01/2026 – Present | Jaipur

- Developing a Project Management System using MERN Stack (MongoDB, Express.js, React.js, Node.js).
- Built responsive, reusable UI components with React.js, Tailwind CSS, and shadcn/ui.
- Implemented RESTful APIs, CRUD operations, JWT authentication, and RBAC for secure access.
- Managed server state, API integration, validation, and performance optimization.
- Collaborating with team using Git/GitHub and Agile workflows.

RNS IT Solution, Frontend Developer Intern 07/2025 – 12/2025 | Jaipur

- Built responsive and mobile-first UI using React.js, Tailwind CSS, HTML5, CSS3, and JavaScript (ES6+).
- Developed reusable components from Figma designs for scalable architecture.
- Integrated RESTful APIs, CRUD operations, JWT authentication, and state management.
- Improved performance, accessibility, and cross-browser compatibility.
- Collaborated with team using Git/GitHub and Agile workflows.

PROJECTS

Salon-Web, Role-Based Salon Management System (Frontend)

- Developed a responsive role-based web app using React.js, Redux, and Tailwind CSS.
- Built multi-role dashboards with RBAC, JWT authentication, and protected routes.
- Integrated RESTful APIs for CRUD operations and state management.
- Enhanced UX with validation, error handling, and performance optimization.
- Designed scalable, reusable component architecture.

Project Management System, Frontend Web Application

- Built a responsive and scalable web app using React.js, shadcn/ui, and TanStack Query.
- Developed reusable components and dynamic tables for projects, tasks, and user management.
- Implemented RBAC, authentication, and protected routes for secure access.
- Integrated RESTful APIs, CRUD operations, and server-state caching for efficient data handling.
- Improved performance, validation, and overall user experience with clean architecture.

School Management System, Backend API Development

- Developed a secure and scalable backend using Node.js and Express.js to manage students, teachers, and records.
- Implemented JWT authentication and RBAC authorization for role-based access control.
- Designed MongoDB schemas and relationships for structured data management.
- Built RESTful APIs with CRUD operations, validation, and business logic.
- Ensured security, performance optimization, and API testing using Postman and Git/GitHub.

SKILLS

Frontend (HTML5, CSS3, Bootstrap, Tailwind CSS, JavaScript (ES6+), React.js, Responsive Design, TanStack Query) | **Backend** (Node.js, Express.js, Socket.io, REST full API) | **Database** (MongoDB, PostgreSQL,) | **Tools** (Git, GitHub, Postman,)

SOFT SKILLS :-

Communication, Teamwork, Problem Solving, Quick Learner, Time Management

EDUCATION

Bachelor of arts (MDSU University)

MERN Stack Developer Course (Tipsng)
